2	27024733	10	20	10	INSTALLATION & COMM. SOFTWARE MATERIALS			1	LO	Email : RUDRA.SAHOO@AMNS.IN				Item Details : Hardware installation, commissioning, testing, Integration with various platform (Govt <(>&<)> AMNS) DLMAS Software configuration at site. Detailed Bifurcation of Implementation Activities 1. Hardware Installation • Site Survey <(>&<)> Preparation Includes checking availability of power supply, grounding, and network infrastructure at the site. • Physical Installation mounting of sensors, control panels, servers, and other devices as per layout. • Hardware Power-up <(>&<)> Verification Initial powering on of installed equipment and confirming basic operational status. 2. Commissioning • Device Configuration Configuration of network parameters, device IDs, communication ports, etc. • System Calibration Calibration of equipment for accuracy and consistency as per operational requirements. • Safety Checks <(>&<)> Compliance Verification of electrical safety, installation standards, and compliance with local and national regulations. 3. Testing • Functional Testing Verification of individual equipment functionality and sensor outputs. • Integration Testing Testing the communication and data flow between components and with the central system. • Troubleshooting <(>&<)> Issue Fixing Rectification of issues found during testing and confirmation of proper system behavior. 4. Integration with External Platforms (Govt. <(>&<)> AMNS) • API Integration Setting up API connectivity with external systems such as CPCB/SPCB and AMNS platforms. • Data Protocol Mapping Ensuring proper data format conversion (JSON, XML, CSV) as per platform requirements. • Testing with Live Data Running tests with real-time or simulated data to validate integration performance. • Certification Support Support in preparing technical documentation and test data for approval by authorities. 5. DLMAS Software Configuration • Software Installation Installation of DLMAS modules on servers/workstations as per system architecture.
