

Request for Proposal (RFP): Steel Yard Management – Real-Time Yard Management Solution for Steel Coils

1. Introduction and Purpose

AM/NS India is seeking proposals from qualified vendors for the design, development, and implementation of a **"Steel Yard Management" – a real-time yard management solution for steel Coils**. This solution aims to revolutionize our steel Coil inventory and logistics operations by leveraging cutting-edge technology to enhance visibility, efficiency, and safety within our storage yards.

The primary objective of this RFP is to select a partner capable of delivering a comprehensive, scalable, and robust system that meets the detailed requirements outlined herein. We are looking for an innovative solution that minimizes manual intervention, reduces operational costs, and provides actionable insights for optimized yard management.

2. Project Background

Currently, our steel Coil yard management relies on a combination of manual processes and systems, leading to challenges such as:

- Limited real-time visibility into Coil locations and inventory.
- Increased time and effort for Coil retrieval and placement.
- Higher risk of misplacement or damages of steel Coils.
- Difficulties in tracking aging inventory and ensuring compliance.

The **Steel Yard Management** solution will address these pain points by introducing a digital, real-time, and intelligent system to improve operational efficiency and decision-making.

3. Scope of Work

The selected vendor will be responsible for the end-to-end delivery of the **Steel Yard Management** solution, including but not limited to:

3.1. Core System Features

- **Real-time Positioning:** Implementation of a system for **real-time positioning of each steel Coil** within the yard using suitable tagging/sensor technologies (e.g., RFID, GPS, UWB).
- **Steel Coil Tracking:**
 - Assignment of a **unique ID** to each steel Coil.
 - Comprehensive tracking of **movement history, condition, batch information, and grade**.
- **Inventory Dashboard:** A centralized, live dashboard providing **real-time inventory updates** with advanced filtering capabilities (e.g., by grade, size, production line, aging, and status).

3.2. Integration Capabilities

- Seamless integration with existing enterprise systems, including:
 - **ERP systems** (e.g., SAP – S4 HANA).
 - **Logistics modules.**

3.3. Alerts & Notifications

- Configuration and delivery of real-time alerts and notifications for critical events, including:
 - **Misplaced Coil alerts.**
 - **Aging inventory notifications.**
 - **Unauthorized movement detection.**

4. Technical Requirements

Vendors should propose a robust and scalable technology stack that aligns with modern industry best practices. vendors are encouraged to propose solution that offers superior value or capabilities.

5. Deliverables

The selected vendor will be responsible for delivering the following:

- Detailed project plan and timelines.
- System design documentation (architecture, database schema, API specifications).
- Developed and fully tested **Steel Yard Management** Solution.
- Integrated and supply of all hardware components (tagging, scanners, etc.) & **System connectivity (i.e. Wi-Fi / Networking etc.)**
- Supply of any manpower for operation of this solution.
- Integration with specified ERP and Logistics systems.
- Comprehensive user manuals and technical documentation.
- Training for our staff on system operation and administration.
- Deployment and go-live support.
- Post-implementation support and maintenance plan.
- **Inventory reconciliation to be done for Physical & System Stocks**

6. Benefits

The successful implementation of the **Steel Yard Management** solution is expected to yield significant benefits, including:

-
- **Increased Yard Visibility:** Real-time insights into the location and status of every steel Coil.
- **Reduction in Coil Retrieval Time:** Optimized placement and accurate location data will significantly speed up retrieval processes.
- **Minimized Loss/Misplacement:** Enhanced tracking and alert systems will drastically reduce lost or misplaced inventory.
- **Better Compliance & Safety:** Improved adherence to storage regulations and safer yard operations.
- **Scalability:** The solution should be scalable to accommodate growth and adaptable for other yards or materials beyond steel Coils.

7. Proposal Submission Requirements

Interested vendors are requested to submit a comprehensive proposal that includes, but is not limited to, the following sections:

- **Executive Summary:** A high-level overview of your proposed solution and how it meets our needs.
- **Company Profile:** Information about your company, relevant experience, and qualifications.
- **Proposed Solution:** A detailed description of your proposed **Steel Yard Management** solution, including:
 - Approach to each feature outlined in Section 3.
 - Proposed hardware and software architecture.
 - Specific technologies to be used.
 - User experience interfaces.
 - Approach to system integration.
- **Project Plan:** Detailed project timelines, milestones, and resource allocation.
- **Team Composition:** Resumes of key personnel who will be assigned to this project.
- **References:** At least three client references for similar projects.
- **Cost Proposal:** A detailed breakdown of all costs, including development, hardware, software licenses, implementation, training, and ongoing support. **All Hardware & Software will have to be supported with Manufacturer's Guarantee / warranty.**
- **Support & Maintenance:** Outline of your proposed post-implementation support and maintenance services with **specific timeline**.
- **Risk Management:** Identification of potential risks and proposed mitigation strategies.
- **Safety Protocol :** All safety protocols & requirements to be followed during execution of project.

•

8. Evaluation Criteria

Proposals will be evaluated based on the following criteria:

- **Vendor Experience and Qualifications:** Demonstrated expertise in IoT, real-time systems, and similar industrial solutions.
- **Technical Solution:** Innovativeness, robustness, scalability, and adherence to technical requirements.
- **Project Methodology and Plan:** Clarity, feasibility, and comprehensiveness of the proposed project plan.
- **Cost-Effectiveness:** Overall value for money.
- **Support and Maintenance Plan:** Quality and responsiveness of proposed post-implementation support.
- **References:** Client testimonials and project success stories.

9. Value-added options

You may also offer :

- Any improvised modules to **suggest optimal storage locations** for incoming Coils based on parameters such as size, dispatch urgency, and material type.
- Development of **Visual layout of the yard**, accurately reflecting the current state and arrangement of steel Coils, **with photos** etc.

We look forward to receiving your innovative proposals for the **Steel Yard Management** project.
